A programme to bring together young people from different backgrounds and levels of achievement to work together in their local community. Team is a full time 12 week programme of personal development which includes team building activities, a week at a residential activity centre and team work on real projects in the local community as well as individual work placements.

New challenges and experiences

When you start on the Team programme, you'll uncover your hidden talents, build your self esteem and improve your confidence. You'll realise there are loads of opportunities for you out there. You'll learn how to work closely with others and come out ready to give your life a kick-start with new skills and qualifications.

Fact: more than three in four young people we supported last year moved into work, education or training.
