

Enrichment Schools Provision - through water based learning

Ofsted focused Schools Provision

Islington Boat Club has been an integral part of the Islington community for over 53 years.

We work closely with many State, Independent and specialist schools. This collaboration has enabled us to cultivate a stellar reputation for excellence, whilst facilitating enriching experiences for young people.

We offer a wide range of bespoke outdoor education programmes, which have been adapted to provide a unique alternative to traditional Primary and secondary Physical Education programs.

Our diverse range of tailored classes have been adapted to coincide with GCSE, BTEC and National Curriculum requirements.

In addition, our offer extends beyond physical development. Outcomes achieved through our activities closely align with current Ofsted requirements. These guidelines emphasise the importance of schools offering extracurricular activities that enhance student's overall educational experiences.

Enrichment opportunities:

- Proven student development
- Opportunities to enhance and broaden development by extending student's curriculum beyond academic practices
- Technical and vocational, helping your pupils to develop new interests and talents
- Support for students to strengthen and develop positive character traits such as resilience, independence, and strength of character
- We provide rich experiences through extra-curricular activities, thus strengthening your school's ability to ensure an exceptional personal development journey for pupils

This can be achieved through a variety of tailored packages:

- Structured weekly paddle sport sessions, working towards internationally recognised Paddle UK accreditations
- Water-based fun days in a variety of craft ie. Canoeing, Kayaking, Bell Boating, Narrow Boating & Power Boating
- Bespoke taster sessions
- Tailored paddle sport sessions for small groups or individuals
- Royal Yachting Association Crew Courses
- Royal Yachting Association Narrow Boat Helm Courses
- Educational or recreational Narrow Boat Trips

We have had an influx of positive feedback from parents and teachers, highlighting significant improvements and positive changes in students.

Observations have been made, noting heightened focus, improved behaviour, increased concentration, teamwork and problem solving skills.

These attributes have been extended into and beyond the confines of the school environment, contributing to exponential growth within student's academic and personal lives.
